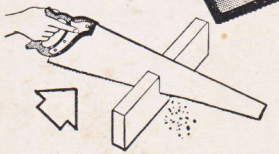
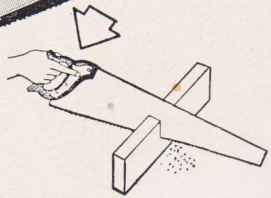
WHY SANDVIK HAND SAWS CUT *DEEPER* WITH *LESS* EFFORT

SANDVIK
SWEDISH STEEL



HOW SANDVIK'S HIGHER CROWN CUTS *DEEPER*
Unusually high crown lengthens the saw's cutting edge without lengthening the blade, giving a deeper cut every time!



HOW SANDVIK'S HANDLE MAKES SAWING EASIER
Sandvik's handle is man-sized to prevent finger fatigue and to allow maximum power in every blade thrust you make.

1/3
LESS SHARPENING

WHY IT PAYS TO BUY A SANDVIK HAND SAW
Made of the finest Swedish Steel, the Sandvik Hand Saw needs only a third of the sharpening other saws require . . . which means a cutting life *three times greater!*

AT BETTER HARDWARE STORES EVERYWHERE!
